Development Report & Greetings

Japanese Learning Platform — Prototype Implementation Update

Today's milestone: All vocabulary categories fully implemented

Issued: **June 27, 2026**

Produced by: **STELLAR / MOFURI**

Subject: **Sakura Speak — Public LP & Member Area prototype**

Greetings

Thank you, as always, for your continued partnership. We are delighted to be developing the Sakura Speak prototype. We are especially grateful for the clear product specification and the valuable vocabulary lists (107 pages in total) you provided.

This report summarizes everything implemented to date and shares the **live URLs** where you can try the product directly in your browser. Guided by the concept of a "serious, systematic learning platform" for Japanese learners abroad, we have prepared a hands-on experience that spans the full journey — from the public landing page all the way through the member area.

Most importantly, today we **completed the integration of all categories** of your **Vocabulary Sheets** — the centerpiece of your marketing. Learners can browse vocabulary by real-life scenes such as "supermarket," "bank," "airport," and "restaurant," and tap any word to hear its pronunciation.

Today at a glance summary

19

Live routes (screens)

10

Vocabulary categories

101

Vocabulary sheets
(topics)

2,122

Words included

The core user flow is up and running as a prototype: public LP, sign-up & subscription, member dashboard, lessons, mini-games, vocabulary, avatar, profile, community, review, news, and the admin console. Japanese/English language switching and mobile (smartphone) layouts are also supported.

Vocabulary Sheets — all categories complete today's main deliverable

Based on the vocabulary PDF you supplied, every word has been digitized with **kanji, kana, romaji, and English**. Because the Japanese text could not be machine-extracted from the source, each page was transcribed by hand to ensure accuracy. Learners pick a category, open a topic sheet, and tap a card to **hear the pronunciation**; a "Quiz mode" hides the meanings for self-testing.

Category	Sample topics	Status
Home & Daily Life	Living Room / Kitchen / Cleaning & Laundry / Furniture, etc.	Done
Shopping & Retail	Supermarket / Convenience Store / Fashion / Payments, etc.	Done
Food & Dining	Restaurant / Japanese cuisine / Sushi / Izakaya / Cafe, etc. (19 topics)	Done
Travel & Tourism	Airport / Tickets & Booking / Hotel / Sightseeing, etc.	Done
Public Life & Services	Banking & ATMs / Post Office / City Hall / Hospital, etc.	Done
Education & Career	School / Supplies / Job Hunting / Remote Work, etc.	Done
Social & Identity	Family / Friends / Emotions / Personality, etc.	Done
Nature & Seasons	Weather / Four Seasons / Plants & Animals / Disasters, etc.	Done
Leisure & Entertainment	Music / Anime & Manga / Video Games / Movies, etc. (10 topics)	Done
Conversation & Slang	Counters / Onomatopoeia / Frequency adverbs / Time, Conjunctions, Directions	Done

Note: For the "Conversation & Slang" category, the originally planned placeholder topics (Casual Phrases, Dialects, etc.) had no corresponding data in the PDF, so we replaced them with the topics actually present in the source — **Counters, Onomatopoeia, Frequency Adverbs, Time Words, Conjunctions, and Directional Words**. The PDF also still contains a large amount of vocabulary not yet covered by the current 10 categories (ceremonies, holidays, sports, sensory words for colors and shapes, grouped verbs, etc.), which we can add by expanding the taxonomy on request.

Key features implemented

Public area (marketing LP)

- ✦ Hero / About / Features / Curriculum (80 lessons, Class A–D) / 4 pricing plans / FAQ / CTA
- ✦ The mascot "Meemi" hand-built in SVG (structured for easy swap once official art arrives)
- ✦ Japanese / English language switching; smartphone support (including the hamburger menu)

Member area

- ✦ Dashboard (progress, streak, coins, today's goals, news)
- ✦ Lessons (immersive player screen, browser speech-synthesis pronunciation, multiple exercise types)
- ✦ Three mini-games (timed quiz / memory match / listening) that auto-link to the vocabulary data
- ✦ Vocabulary Sheets (completed today, above) / Review sheets / News reader
- ✦ Meemi avatar customizer (parametric SVG, dress-up, save)
- ✦ Profile & social (follow, etc.), Community (chat, voice rooms, events)

Foundation & operations

- ✦ Auth screens (login / sign-up / email verification) and subscription (multi-currency, coupons, cancellation flow)
- ✦ Admin CMS (role-based permissions; news, events, users, and report moderation)
- ✦ Onboarding (first-run tutorial — a guided tour that highlights the real UI)

Live URLs (try it on real devices)

► Home (public landing page)

<https://jiantailanglin266-rgb.github.io/sakura-speak-lp/>

► Today's highlight: Vocabulary Sheets (member area)

<https://jiantailanglin266-rgb.github.io/sakura-speak-lp/dashboard/vocab/>

Screen	URL (under the domain above)
Member dashboard	/dashboard/
Lessons	/dashboard/lessons/
Mini-games	/dashboard/games/
Avatar creator	/dashboard/avatar/
Profile / Community	/dashboard/profile/ · /dashboard/community/
Sign-up / Checkout	/auth/ · /subscribe/
Admin console (CMS)	/admin/

Note: You can also reach the member area via the "Dashboard (demo)" link in the public LP footer. This is a pre-data prototype, so inputs, purchases, and submissions are demo behavior (no real charges or messages are sent). Audio uses the device's built-in browser speech synthesis.

Next steps (for discussion)

- ✦ Integrate the remaining vocabulary (beyond the 10 categories: ceremonies, holidays, sports, sensory words, etc. — via taxonomy expansion)
- ✦ Produce the full lesson content (Class A–D; the scope of material you plan to provide)
- ✦ Production hardening: authentication (Supabase), live Stripe billing, database design, server-side audio quality
- ✦ Replace Meemi with the official mascot artwork

This report captures where things stand today. We'd be grateful if you could try the screens yourself and share your candid thoughts on usability, design direction, and which features you'd like us to prioritize next. We will continue working hard to make Sakura Speak the best it can be. Thank you very much.
